The

[VAXXED](#) film crew continues interviewing people who are vaccine damaged around the country.

In this interview in Nebraska, 14 year old Savannah Snyder is interviewed along with her mother Sarah.

Savannah talks about her experiences in receiving her 7th grade required vaccines. Her mother Sarah explains that she only gave permission for Savannah to receive the required vaccines. Gardasil, the HPV vaccine, is an optional vaccine. Sarah explains that she had been warned about this vaccine and wanted to investigate it further.

| *You believe your doctor. Every parent believes their doctor. We're all trying to do the right thing.*

But Savannah was given the Gardasil vaccine anyway, without their original knowledge. She immediately started suffering some side effects, such as a headache, almost fainting, and skin rashes breaking out. She soon developed pneumonia and other infections.

As time went on, things got worse. She started experiencing seizures, including grand mal seizures. She was hospitalized many times for severe pain. Her mother tearfully explains that Savannah would wake up in the middle of the night and state that she was dying.

Like many other parents of children with Gardasil injuries, Sarah relates how they had little support, and that most people just thought it was all in Savannah's head.

But after a trip to the Mayo clinic, Savannah was diagnosed with POTS (postural orthostatic tachycardia syndrome), a known side effect of Gardasil that affects the heart. (See: [Cardiologist Comments on New Study Linking HPV Vaccines to POTS](#))

Savannah explains that before the Gardasil shot, she was very active and athletic. She was in the process of joining a gym. Now, she has difficulties speaking and walking, and needs a feeding tube.

### **Medical Doctors Opposed to Forced Vaccinations – Should Their Views be Silenced?**

One of the biggest myths being propagated in the compliant mainstream media today is that doctors are either pro-vaccine or anti-vaccine, and that the anti-vaccine doctors are all “quacks.”

However, nothing could be further from the truth in the vaccine debate. Doctors are not unified at all on their positions regarding “the science” of vaccines, nor are they unified in the position of removing informed consent to a medical procedure like vaccines.

The two most extreme positions are those doctors who are 100% against vaccines and do not administer them at all, and those doctors that believe that ALL vaccines are safe and effective for ALL people, ALL the time, by force if necessary.

Very few doctors fall into either of these two extremist positions, and yet it is the extreme pro-vaccine position that is presented by the U.S. Government and mainstream media as being the dominant position of the medical field.

In between these two extreme views, however, is where the vast majority of doctors practicing today would probably categorize their position. Many doctors who consider themselves “pro-vaccine,” for example, do not believe that every single vaccine is appropriate for every single individual.

Many doctors recommend a “delayed” vaccine schedule for some patients, and not always the recommended one-size-fits-all CDC childhood schedule. Other doctors choose to recommend vaccines based on the actual science and merit of each vaccine, recommending some, while determining that others are not worth the risk for children, such as the suspect seasonal flu shot.

These doctors who do not hold extreme positions would be opposed to government-mandated vaccinations and the removal of all parental exemptions.

In this eBook, I am going to summarize the many doctors today who do not take the most extremist pro-vaccine position, which is probably not held by very many doctors at all, in spite of what the pharmaceutical industry, the federal government, and the mainstream media would like the public to believe.

Leaving a lucrative career as a nephrologist (kidney doctor), Dr. Suzanne Humphries is now free to actually help cure people. In this autobiography she explains why good doctors are constrained within the current corrupt medical system from practicing real, ethical medicine. FREE Shipping Available! [Order here.](#)

## **Dr. Andrew Moulden: Every Vaccine Produces Harm**

Canadian physician Dr. Andrew Moulden provided clear scientific evidence to prove that every dose of vaccine given to a child or an adult produces harm. The truth that he uncovered was rejected by the conventional medical system and the pharmaceutical industry. Nevertheless, his warning and his message to America remains as a solid legacy of the man who stood up against big pharma and their program to vaccinate every person on the Earth.

Dr. Moulden died unexpectedly in November of 2013 at age 49.

Because of the strong opposition from big pharma concerning Dr. Moulden's research, we became concerned that the name of this brilliant researcher and his life's work had nearly been deleted from the internet. His reputation was being disparaged, and his message of warning and hope was being distorted and buried without a tombstone. This book summarizes his teaching and is a must-read for everyone who wants to learn the "other-side" of the vaccine debate that the mainstream media routinely censors.
